Light of the Future

project partner from:

Vocational Training College
Bonn, Germany

Liceo Enriques Roma, Italy

Lyceum Veria, Greece

Erasmus+
Project idea Light of the Future

It is getting brighter and brighter on earth.
Project idea Light of the Future

The project is supported by the research association Loss of Night.
Section 1
What is light pollution? How did it come about that our night is getting brighter and brighter? Why can we no longer see the starry sky? Do we even know our place in the universe?

Section 2
Who are the victims of light pollution? How can we measure and assess light pollution where we live?

Section 3
How can we reduce light pollution in our home town?
Project progress

1. Video conference - Get to know us  Mai 2021

Project idea

1. Raising awareness of light pollution
2. Analysis of the lightning situation in the home region
3. Exchange of results on light pollution
4. Consequences and action against light pollution

You have worked!
Project progress

2. Conference in Veria April 2022

But they also continued to get to know each other and celebrate!
The project is about Light Pollution, a new kind of pollution, which not many people are familiar with.
It is connected with an Erasmus KA2 project with the title "Light of the Future" (2020-1-DE03-KA229-077239).
The participant schools are Vocational Training College Bonn - Duisdorf (Germany), Liceo Scientifico Statale "Federigo Enriques" - Rome (Italy) and the 5th General Lyceum - Veria (Greece).

**Teacher Bulletin**

Dear colleagues, today we met the students on Teams, with a video conference. They presented short reports on the trip to Bonn. You can find the reports in Materials > Files > Experiences in Bonn. Our next meeting will be in January. Let me take this opportunity to wish you all very Merry Christmas and a Happy New Year! Elena
