Welcome to the eTwinning workshop
„There is no planet B – schools in action“

An insight into an eTwinning project with students from Germany, Spain and Italy
Contents of this workshop

- Schools involved?
- General idea of the project
- Activities
- Results of the international group work
- Best practice – examples of an Erasmus project
- Questions – discussion
Schools involved

Paderborn, Germany, Nicole Broer

Bilbao, Spain Iñaki Oar-Arteta

Udine, Italy Stefania Nonino
General idea of the project

The project started in September 2021 and will be finished in May 2022. The students are between 16 and 19 years old. The main idea is that students

1. find out about the main challenges that we have to face with regard to climate change

2. report about local or regional initiatives that are fighting against environmental pollution

3. think about what schools and students could do themselves to protect the environment
Activities of the project

- Protection of the environment – Are you an expert already?
- Our wishes for a new and climate-friendly year
- Logo competition
- Definitions and presentations of environmental issues
- Eco-friendly initiatives all over Europe
- Schools in action
- Extra activity – There is no planet B – stop the war
Results of the international group work

- Our carbon footprints
- Microplastics and ocean pollution
- Sustainable food
Best practice
Examples of an Erasmus project with Germany, France, Spain and Poland

- Students' presentation on how to produce less carbon dioxide
- Students' presentation on water issues
- The Erasmus TV-Show
Best practice
Collecting rubbish at the beach and creating an art
France, Arcachon
Best practice
Collecting rubbish at the beach and creating an art
Thanks a lot for your attention!

There is no planet B but a future generation B

Let’s take care of the one planet we have
