Heinrich-Heine Gymnasium der Stadt Dortmund

International Exchange

Dortmund
First attempt to create a school garden at HHG

We decided that the garden needed more colour...

...and we realised that it would take much work to keep the garden alive.

So our Erasmus plus project came to life.
Ciao!
Job Shadowing Padua

Martin und Sara

working together on our colour gardens

visit to the local botanical garden of Padua

a day at school in Padua
A Week in Dortmund
our experience of working on an international project

think big and have a vision
- you will have to face obstacles along the way
- find different ways to reach your goal
- plan C, D or E might be necessary
- failure promotes growth

work together and find people who could support you
- who work with you
- from your local area
- ask people if they know someone who might be interested in working with you

communication is key

sustainability and longevity
- think about ways to incorporate new ideas into already existing concepts that work well
- create a network that helps you achieve your goals
- keep it feasible for all parties involved
- stay flexible and be open to alternations

think big and have a vision

work together and find people who could support you

communication is key

sustainability and longevity
